

Welcome to our School Books Catalogue, 2014

The name Frank Brothers is synonymous with quality in academic publishing for eighty years. Students all across India have used and enjoyed books from Frank Brothers. As an educationalist, Frank Brothers is treading a new path this year.

Our research and well-informed insights into modern education have helped us understand that although the time to learn is fixed, the quantum of learning is variable. Every year, students get the time frame of '*one academic year*' to learn as much as they can about a multitude of subjects. The system of '*one academic year*' allows some students to excel with flying colours while others face huge obstacles in terms of knowledge gaps.

The company has taken the initiative to improve the system of education by attempting to fill these knowledge gaps through **blended learning**. Blended learning is self-paced and self-assessed; it allows students to imbibe the concepts on their own and then use the classroom for interaction.

Our portfolio this year carries the highly trusted *Joy of Mathematics* in a new avatar supported by interactive digital content. The ever popular Frank Middle School Geography, Frank CCE Everyday Science, Joyful Living and Frank Computer Science have been revised.

Looking forward to a fruitful partnership.

Best wishes for the academic year ahead.

Amitabh Nagpal

Macmillan Group (India)

FRANK BROTHERS & CO.

From the desk of Chairman Emeritus

'The rung of a ladder was never meant to rest upon, but only to hold a man's foot long enough to enable him to put the other somewhat higher.'

—Thomas Henry Huxley

Frank Brothers was set up in 1930 by Mr K. L. Govil, with a vision to provide trusted books and to always keep the customer satisfied. Since then the company has been at the forefront of school publishing. Today it has a strong business footing not only in India, but also in UAE, Muscat, Oman, Saudi Arabia, Sri Lanka, and Nepal, etc.

The company was the first to introduce *Modern Mathematics* in ICSE, the first to incorporate CCE, the first to create customised books for State Boards and more. Frank Brothers has leading educationalists to its name—Ms Lorraine Mirza of the highly popular *Joy of Mathematics*, Mr Stalin Malhotra of *Learn 'n' Play Mathematics*, Mrs Hilda Peacock, Mr D. K. Sethi and Mr S. N. Chhibber to name a few.

I am proud to say that **Frank Brothers** has merged with **Macmillan Worldwide**—one of the best-known international publishers operating in 100+ countries. Its publishing endeavours encompass high-quality textbooks, fiction and science journals through illustrious imprints, such as Nature, Palgrave, and Picador. Macmillan is looking at increasing its presence in India and acquiring Frank Brothers is a part of its strategy. Macmillan shares our conviction, passion and farsightedness for the betterment of schooling in India.

It is a rare opportunity for Frank Brothers to become a part of Macmillan Education and take advantage of Macmillan's creativity and research **to offer innovative products to our students, global teaching tools to our teachers, and most importantly enable our partner schools to stay ahead in the competitive educational environment.**

Going forward, Frank Brothers and Macmillan Education will continue to provide the best books by the best-known authors in a wider portfolio to schools of varying affiliations, such as IB, CBSE, ICSE and State Boards.

R. C. Govil

JOY OF MATHEMATICS

CLASSES 0 TO 5

CLASSES 6 TO 8 (REVISED)

Highlights

- Joy of Mathematics for classes 0 to 8 is a series of nine books designed in strict conformity with the latest syllabus prescribed by the Inter-State Board for Anglo-Indian Education, which has been recommended by CISCE
- The series covers the latest syllabus followed by the ICSE and other state boards and the topics are presented in a concentric and graded pattern, built upon previous knowledge
- The books include *Maths lab activity* and *Project* to help students work on individual assignment and group work in a fun way
- *Connect to the world* provides important information about the topic like the history behind it, scientists related to the topic, its usage in real life, etc
- *Step up* empowers students to think out-of-the-box
