**Macmillan English Grammar in Context** is a cross-curricular, 3-level grammar practice series for adult and young adult learners, designed to revise and consolidate key grammatical structures.

The books put grammar in context and present it in more interesting ways. The topics covered in the exercises can be used as a starting point for a lesson, as a subject for discussion, and as a means of helping students build their vocabulary. There is opportunity for individual study, group work and homework, plus testing, in the different sections of the book.

- A combination of everyday English and relevant academic language teaches students to use grammatical structures in context.
- Exercises range in difficulty within each unit to allow learners to increase their confidence as they move from straightforward activities to more challenging ones.
- A fully searchable glossary gives additional support and points of reference to facilitate learning outside of the classroom.
- The *Review* section offers additional activities for students who want to check their understanding or for extra practice.
- A CD-ROM includes extra practice and printable tests, making the course perfect for using both at home and in the classroom.
